

DAPHNE4NFDI @ SNI2022, Berlin

Finally!

During the German Conference for Research with Synchrotron Radiation, Neutrons and Ion Beams at Large Facilities (SNI2022) that took place in Berlin, Germany from 5th to 7th September 2022 some DAPHNE4NFDI task areas leaders as well as PhDs, Postdocs and other participants of the project met in person! to talk about latest developments and ideas for the future. The three-day conference gave rise to great discussions - not only during the Micro Symposium on “Data & Digitalization” and the two poster sessions.

We are already looking forward to the next DAPHNE4NFDI in-person meetings – so stay tuned!
